

Learning Skills

High-school students receive a wealth of information, techniques, and advice on what they should learn, but very little coaching on *how* to learn and *how* to improve their ability to learn. *Learning Skills* closes that gap.

Available on CD-ROM, the *Learning Skills* uses demonstration, guided discovery, humorous animation segments, and a strong emphasis on results. Students improve their learning skills by working through a series of modules. Modules include:

- Using Graphic Organizers
- Note Taking
- Memorizing
- Reading

The CD-ROM opens to a visually appealing home page that introduces the animated characters that guide users through the disk and provides a menu of modules. Each module begins with a pretest, and is followed by an explanation and demonstration of the topic, interactive exercises, and finishes with an assessment quiz.

- Grades 7 to 12
